PAGE 1 OF 1

Quality

Dynamic Fluid Solutions is built on the foundations of quality products with quality service. To continue to achieve this, every individual at every level must strive to reach the standards that have been set. If you see an opportunity to improve the quality of our services or products in any way, the management team are very open to discuss.

Environmental

With the nature of our industry there are obvious environmental impacts; at Dynamic Fluid Solutions we are committed to reducing these impacts in every way we can. This requires all staff members to be aware of potential environmental impacts of their actions. All staff are urged to contact the Company Director responsible for HSEQ, if they are unsure of what environmental impact an action may have.

Safety

We all have a duty to comply with all relevant health and safety legislation. As a company we are open to any suggestions to improve upon our safety systems. Safety is of paramount importance to us as a business and urge all employees to think of any negative safety connotations prior to any action that is about to be taken – if you are uncertain, then stop and consider a safer option; we shall aim to eliminate risk where at all possible.
